+55 11 962531469 - São Paulo, Brazil

Focused and motivated Python Software Engineer with over six years of experience in web development. I specialize in creating innovative products and robust RESTful APIs, troubleshooting issues, and collaborating and assisting team members. I also can work independently and communicate effectively to solve real-world challenges and make a difference through technology.

WORK EXPERIENCE

Senior Software Engineer
Jul 2024 - Present

FNS Coder - Freelancer

• Collaborated as a full-stack engineer for multiple clients, focusing on integrations with third-party services, developing new features, and improving the code base.

• Delivered scalable and reliable solutions within both monolith and microservices environments.

• Specialized in Python and Django while also contributing to projects involving React and Node.js.

Main technologies used:

Python, Django, Django Rest Framework, React, Node.js, Docker, Postgresql, AWS, Github, Sentry, Circle-ci, Unit testing.

Senior Software Engineer
Jan 2024 - Jul 2024

LeafLink | New York, US

• I worked on backend development for marketplace and payments platforms, enhancing functionality and user experience through distributed, scale, robust APIs and secure payment processing integration.

• Demonstrated problem-solving excellence and innovation and drove significant improvements in platform reliability and transaction efficiency, contributing to LeafLink's growth and market position.

Main technologies used:

Python, Django, Django Rest Framework, Flask, Docker, Github, Github actions, ArgoCD, Sentry, Datadog, Grafana, Postgresql, Pytest, AWS, SQS, S3.

Senior Software Engineer

Airg Inc. | Vancouver - CA
Feb 2023 - Jan 2024

• Created integrations between airG/partners products, such as games and digital content, and mobile carriers using microservices.

Main technologies used:

Python, Flask, Perl, Java, Javascript, Gitlab, Postgres, Mongodb, AWS, and Docker.

Senior Software Engineer   Mar 2022 - Feb 2023
Routable (YCS17) | Seatle, US

- Implemented brand new sign-up flow and helped onboard clients faster thus unblocking sales and increasing the number of clients Routable has.
- Implemented integrations with third-party services APIs such as Alloy and Xero marketplace to improve the platform's reliability.

Main technologies used:
Python, Django, Django Rest Framework, Docker, HTML, CSS, JS, React, Github, Github actions, Sentry, Postgresql, Redis, Unitest, Testrail, AWS.

Software Engineer   Mar 2021 - Mar 2022
ConsumerAffairs | Tulsa, US

- Established integrations with third-party services APIs such as Twilio, Outreach, and Iterable to improve the platform client's acquisition.
- Implemented async tasks using Celery in a Micro Service environment.
- Encharged with welcoming and onboarding new team members and leading them to deliver complex features involving QA, Product, and DevOps roles.
- Improved and implemented new features on a critical company system used for billing clients.

Main technologies used:
Python, Django, Django Rest Framework, Docker, Github, Sentry, Celery, Rabbitmq, Redis, Postgresql, Pytest, AWS.

Software Developer   Jun 2019 - Mar 2021
Joyjet Digital Space Agency | Paris, France

- I worked on different projects of REST APIs from conception to delivery passing through planning, modeling, development, testing, documentation, and deployment.
- Created integrations with third-party services such as Twilio and Stripe.

Main technologies used:
Python, Django, Django Rest Framework, HTML, CSS, JS, VueJS, React, Docker, Unitest, AWS S3, AWS Elastic Beanstalk, AWS RDS, and Heroku.

EDUCATION

B.Sc. in Information Systems, 2019   **UFSCAR - Universidade Federal de São Carlos**

GENERAL TOOLS AND SKILLS

Jira, Scrum, Kanban, Code Reviews, TDD, Stripe, Twilio, SAAS Environment, YCombinator Startup Experience, Communication, Collaboration, Result Driven, and Dynamic.
